

# DRS 5000 UNIVERSAL

DIGITAL RETRIEVAL SYSTEM

**YOUR SOURCE FOR  
MICROGRAPHIC PRODUCTS**

[www.eyecom.com](http://www.eyecom.com)

## DRS 5000/UNIVERSAL OPTIONAL CARRIERS

- Manual 16/35mm
- Motorized 16/35mm
- Motorized 16mm & 3M cartridge
- Microfiche/Aperature card
- Combined motorized 16/35mm & microfiche

## SPECIAL FEATURES

- **Image Quality** - 3.6 Mega-pixel image quality provides superior quality digital image conversion of film-based and opaque micro media for viewing, printing and distributing.
- **Multi-format versatility** - Provides the flexibility of viewing both negative and positive images on film-based media. The hand-guided carrier is standard for viewing microfiche, jackets, opaque micro or aperture cards; optional configurations accomodate 16mm and 35 mm roll film, 3M cartridges and ANSI cartridges as well.
- **Kiosk Software** - Can be password enabled for secure computing operations.
- **Zoom, Crop and Rotate Images** - Once an image is on-screen, you can zoom into specific areas of an image, or crop any portion of the image. Manual image rotation is available for viewing cine-format images. Zoomed or cropped images can be saved or printed.
- **Save images in Familiar Formats** - Images can be saved in common Bitmap, JPEG, or TIFF file formats.
- **Compatibility** - DRS 5000 can be used with a great range of PCs.

*Easily view microfilm and microfiche through your computer*

## CONVERT PHOTOGRAPHIC DATA TO DIGITAL FORMAT WITH THE DRS 5000/UNIVERSAL

The DRS5000 is an easy to use microfilm reader/scanner with optional attachments for roll microfilm, microfiche and aperture cards. With its low price and a very small foot print the DRS5000 Microfilm Reader/Scanner brings affordable, compact digital microfilm options to every microfilm media user. The DRS5000 is user friendly making it well suited for public use at campuses, archives and libraries.

A single USB 2.0 connection to a computer supplies power and data line to the DRS5000. This allows researchers to easily scroll through microfilm or microfiche; zoom out for a full page or zoom in for enlarged detail. A single press of a button will capture the image instantly making it immediately available to save, print or transfer with multiple saving options such as CD or a USB portable device.

With a wide variety of simple interchangeable carriers the DRS5000 will accept 16/35mm roll film, microfiche or microfilm in 3M style cartridges, and opaque cards. The single high quality, adjustable lens provides full-color magnification between 7x and 48x.

## DRS 5000 SPECIFICATIONS

<b>Lens</b>	Adjustable
<b>Magnification</b>	7x - 48x
<b>Max. Resolution</b>	5 Mega-pixels
<b>Largest viewable area</b>	Full frame 35mm
<b>Image Rotation</b>	Manual 360°
<b>Preview Speed</b>	Live
<b>Capture Speed</b>	Instant
<b>Connection</b>	USB 2.0, TWAIN
<b>Light Source</b>	Cold fluorescent
<b>Temperature Range</b>	0 - 40° C
<b>Operating System</b>	Windows XP Pro
